

### A1d Design your Ideal Library

#### Purpose:

- To get the community excited about the possibilities of what this new library will be for their community.
- To garner feedback about what the community will want the library to do, be, and contain for themselves, families, and neighbors..

#### Description:

For the interactive piece of the workshop, attendees will divide into groups and design a future library around a member of the community. Individuals will use the spaces and places envisioned for the library and create the perfect library for community members and what they will do there.

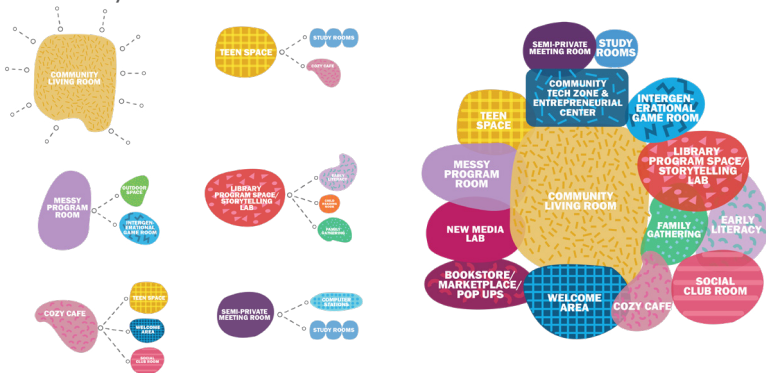

#### Example Materials:

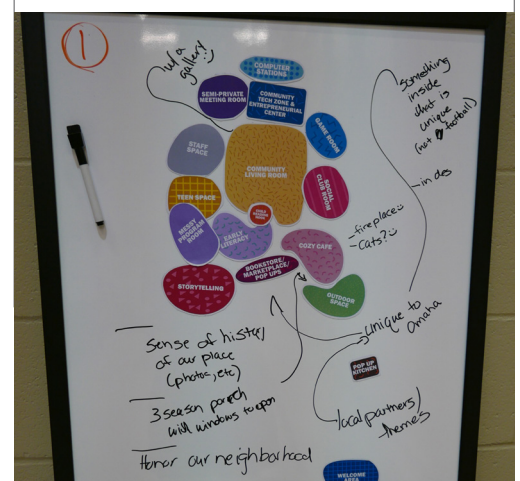

Magnets that identify emerging space types heard through the process.

#### This Results in:

- Community members begin to identify the spaces and places that will make their new library a place where they and their community will want to spend their time, and that will be useful to the community.
- Community members indicate which space adjacencies will be useful to their library experience.
- Program spaces are confirmed and continue to be developed by community members.

Examples of space adjacencies and a concept diagram illustrating resulting from the activity.

Community members creating their ideal library.
